

SMid Growth Strategy

Investment objective: Long-term capital appreciation

The Strategy

Invests in a portfolio of 45-55 companies. Investments are predicated on a company's future prospects rather than economic or market cycles. We value companies with a history of consistent profitable growth versus a growth now, profits later approach.

Approach

We employ a bottom-up fundamental process to identify investments in companies with a history of improving fundamentals, emphasizing earnings growth consistency, free cash flow, and solid balance sheet metrics.

Key Differentiators

Investing in companies that appear well positioned for growth coupled with risk management techniques should provide the foundation to build a high conviction portfolio with potential for consistent returns which aims to lower volatility.

Company Snapshot

Definitions: Russell 2500 Growth Index® measures the performance of the small to mid-cap growth segment of the U.S. equity universe. It includes those Russell 2500 companies with higher growth earning potential as defined by Russell's leading style methodology. The Russell 2500 Growth Index is constructed to provide a comprehensive and unbiased barometer of the small to mid-cap growth market. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set and that the represented companies continue to reflect growth characteristics. **Price/Book** ratio used to compare a company's current market price to its book value **Price/Earnings** valuation of a company's share price compared to its earnings per share; commonly used by investors to determine the value of a company **Weighted Average Market Cap** is the portfolio-weighted mean capitalizations of all equity securities. Frank Russell Company ("Russell") is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Neither Russell nor its licensors accept any liability for any errors or omissions in the Russell Indexes and/or underlying data contained in this communication. #The "Total Firm Assets" column is provided as supplemental information and also includes unified managed account (UMA) assets Congress Asset Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Congress Asset Management has been independently verified for the periods 1/1/96 – 6/30/18. The verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Firm Information: Congress Asset Management Co. (CAM) is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisors Act of 1940. Registration does not imply a certain level of skill or training. CAM manages a variety of public equity, private equity, fixed income and ETF managed portfolios for private and institutional clients. CAM acquired Prelude Asset Management, LLC on March 15, 2010. CAM merged with Congress Capital Partners, LLP on June 30, 2015. CAM acquired certain strategies of Century Capital Management, LLC on September 15, 2017.

Composite Characteristics: The SMid Growth Composite was created on April 1, 2017. This inception date reflects the first full month an account was fully invested in the strategy and met the inclusion criteria. The composite includes all fully discretionary accounts with a value over \$100 thousand (US dollars) managed in the SMid growth style for a minimum of one full month. The SMid growth strategy invests in the equity of high quality companies with market capitalizations between \$300 million and \$20 billion (at the time of purchase) exhibiting consistent earnings growth. Accounts with wrap commissions are excluded from the composite. The primary composite benchmark is the Russell 2500 Growth. The benchmark returns are not covered by the report of the independent verifiers. Closed account data is included in the composite as mandated by the standards in order to eliminate a survivorship bias. A complete list and description of all firm composites is available upon request.

Calculation Methodology: Valuations and returns are computed and stated in U.S. dollars. Monthly composite performance is calculated as an asset-weighted return using the aggregate method. This method aggregates market values and cash flows for all accounts and treats the composite as if it were one account. Monthly composite returns are geometrically linked to produce a time-weighted annual return. The composite is valued daily. Gross of fees returns are calculated gross of management and custodial fees and net of transaction costs. Net of fees returns are calculated using actual management fees. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. Accruals for equity securities are included in calculations. Internal dispersion is calculated using the asset-weighted standard deviation of annual gross-of-fee returns of those portfolios that were included in the composite for the entire year. For those years when less than six portfolios were included in the composite for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. It is not presented because 36-month returns are not available.

Fee Schedule: The firms' individual account fee schedule is as follows: 1.00% for first \$1 million, 0.80% for next \$4 million, 0.60% for next \$5 million. Management fees for individual accounts with assets under management exceeding \$10 million, and for institutional accounts are negotiated. The individual account fee schedule may be subject to negotiation where circumstances warrant. As fees are deducted quarterly, the compounding effect will increase the impact of the fees by an amount directly related to the gross account performance. For example, an account earning a 10% annual gross return with a 1% annual fee deducted quarterly would earn an 8.9% annual net return due to compounding

Other Disclosures: Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance does not guarantee future results. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts. Market conditions can vary widely over time and can result in a loss of portfolio value.
