

All Cap Opportunity Strategy

STRATEGY: Our investment premise is that market inefficiencies exist between fixed income and equity valuation techniques. We seek to uncover these inefficiencies, and identify equity investment opportunities in order to pursue long term capital appreciation.

APPROACH: We employ a combination of formal quantitative screening followed by bottom up fundamental analysis, unconstrained by market cap and style, that results in a high conviction, go anywhere strategy.

BENEFIT: The strategy is opportunistic and unconstrained, providing management flexibility to focus on securities and industries that are often under researched and believed poised to experience earnings growth.

Composite Characteristics: The All Cap Opportunity Composite was created on December 31, 2005 and has an inception date of May 31, 2005. This inception date reflects the first full month an account was fully invested in the strategy and met the inclusion criteria. As of March 31, 2011 the Corporate Recovery Composite was renamed the All Cap Opportunity Composite. The composite includes all fully discretionary accounts with a value over \$100 thousand (US dollars) managed in the all cap opportunity style for a minimum of one consecutive month. The all cap opportunity strategy's investment premise is that market efficiencies exist between fixed income and equity valuation techniques. We seek to uncover these efficiencies, and identify equity investment opportunities in order to pursue long term capital appreciation. We employ a combination of formal quantitative screening followed by bottom up fundamental analysis, unconstrained by market cap and style that results in a high conviction, go anywhere strategy. The strategy is opportunistic and unconstrained, providing management flexibility to focus on securities and industries that are often under researched and believed poised to experience earning growth. Accounts with wrap commissions are excluded from the composite. Prior to January 1, 2016 the composite minimum was \$500 thousand (US dollars). The composite benchmark is the Russell 3000 Index. Effective January 1, 2009 the All Cap Opportunity benchmark was changed retroactively from the S&P 500 Index to the Russell 3000 Index due to closer correlation of returns and market cap allocation. The benchmark returns are not covered by the report of independent verifiers. Closed account data is included in the composite as mandated by the standards in order to eliminate a survivorship bias. A complete list and description of all firm composites is available upon request.

Calculation Methodology: Valuations and returns are computed and stated in U.S. dollars. The firm uses the Modified Dietz formula to calculate monthly returns and links these returns geometrically to produce an accurate time-weighted rate of return. The composite is also revalued intra-month in cases where cash flows in excess of 10% of the composite's value occur. Composite returns are asset-weighted. Gross of fees returns are calculated gross of management and custodial fees and net of transaction costs. Net of fees returns are calculated using actual management fees. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. Accruals for fixed income and equity securities are included in calculations. A maximum of 20% of the portfolio may be invested in the ADRs of foreign companies. Internal dispersion is calculated using the asset-weighted standard deviation of annual gross-of-fees returns of those portfolios that were included in the composite for the entire year. For those years when less than six portfolios were included in the composite for the full year, no dispersion measure is presented. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented for 2005 through 2010 as it is not required for periods prior to 2011. Beginning June 1, 2011 carve-outs were introduced to the All Cap Opportunity composite. The all cap opportunity data is carved out of each eligible balanced account and managed as a separate account with a separate cash balance.

Fee Schedule: The firm's individual account fee schedule is as follows: 1.00% for first \$1 million, 0.80% for next \$4 million, 0.60% for next \$5 million. Management fees for individual accounts with assets under management exceeding \$10 million, and for institutional accounts are negotiated. The individual account fee schedule may be subject to negotiation where circumstances warrant. As fees are deducted quarterly, the compounding effect will increase the impact of the fees by an amount directly related to the gross account performance. For example, an account earning a 10% annual gross return with a 1% annual fee deducted quarterly would earn an 8.9% annual net return due to compounding.

Other Disclosures: From inception until mid-2009 the All Cap Opportunity Composite included one non-fee paying account (which was the only account in the composite). The annual percentage of the composite comprised of non-fee paying assets is listed in the table above. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Past performance does not guarantee future results. This performance report should not be construed as a recommendation to purchase or sell any particular securities held in composite accounts. Market conditions can vary widely over time and can result in a loss of portfolio value.

#The "Total Firm Assets" column is provided as supplemental information and also includes unified managed account (UMA) assets

Congress Asset Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Congress Asset Management has been independently verified for the periods 12/31/95 – 12/31/16. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Mid Cap Growth Composite has been examined for the periods 10/1/99 – 12/31/16. The verification and performance examination reports are available upon request.

Firm Information: Congress Asset Management Co. (CAM) is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisors Act of 1940. Registration does not imply a certain level of skill or training. CAM manages a variety of public equity, private equity, fixed income and ETF managed portfolios for private and institutional clients. CAM acquired Prelude Asset Management, LLC on March 15, 2010. CAM merged with Congress Capital Partners, LLP on June 30, 2015.
