Investment Process

- Understand advisor/client portfolio objectives and risk tolerance to define target market capitalization range (Large, Mid, or Small Cap Growth stocks)
- One-on-one consultation with advisor/client to outline their specific SRI requirements
- Employ a combination of screening methods to uncover companies with higher profitability, balance sheet stability & financial strength relative to their universe
- Perform detailed bottom-up fundamental analysis on companies that pass the initial screening process
- Investment team discusses each potential holding, taking into account investment merits and overall portfolio risk
- Apply the previously decided upon SRI requirements to screen out potential holdings that do not fit the client’s criteria
- The resulting portfolio of 35-45 stocks is continuously reviewed to ensure adherence to investment thesis and SRI screens
